**DESIGN PROPOSAL** 

**Terry Adams** Based on your input, we've incorporated cutting-edge uses of recycled materials. We're very excited about this design and think that visitors to your garden come away with a new perspective on their own garden space. We've designed an every-day sanctuary that pays tribute to the power of nature.

**David Hamilton** For your acreage, you might choose a wide variety of landscape design options, including water features, and natural areas designed to attract and appeal to birds, butterflies, and bees. Below highlights some of the products and services that we recommend. We'll be happy to discuss them according to your interest.
